

ENAMEL

Packaging/weight

Chip size: various	Sheet size: variable according to the chip shape	Thickness: 6 mm	Sqm/box: variable according to the chip shape	Pcs/box: variable according to the chip shape	Kg/sqm: from 11,80 to 15,70
-----------------------	--	--------------------	---	---	--------------------------------

Use

Indoor: yes	Outdoor: yes	Indoor flooring: yes	Wall convering: yes	Shower floor: yes	Shower wall: yes
Swimming pool: yes	Spa: yes	Bathroom countertop: si	Kitchen countertop: yes	Heating floor: yes	

Product composition: 100%* sintered recycled glass

* the percentage varies of some points depending on the pigments used to make the different colors

The geometric and dimensional features of each single chip, created during the industrial manufacturing process, which includes a sintering phase, may have negligible dimensional deviations, such as slight curvature, orthogonality, geometry and subtle chromatic inclusions, without these influencing on the final result of the artefact.

The assembly of the tesserae on the fiberglass net could, due to tolerable geometric irregularities, present slight misalignments, no longer appreciable after the sealing phase.

Surface: matt/gloss

Backing: fiberglass mesh

Joint: between 1 mm and 3 mm, according the chip size

Edge: regular
